

UNIT 1

DAILY FOCUS TRANSPARENCY 1-1

Chapter 1

Complex Behaviors

Assume that the monster pictured is only in the mind of this student.

1. What physiological needs might this student be ignoring?
2. Why is the student ignoring his physiological needs?
3. What does the monster tell you about the student's cognitive, or mental, processes?
4. Are physiological or cognitive needs more difficult to determine from observing another human being? Why?
