

**Graphic Organizer 16**  
**Activity**

**Mood Disorders**

Directions: Psychologists have identified two major mood disorders. One of the mood disorders has two distinct phases. Complete the graphic organizer by listing the two major mood disorders. Under the first disorder, list the symptoms and behavior that often characterize the disorder. Under the second disorder, list the two phases that characterize the disorder. Then, beneath each phase, list the symptoms and behavior that are typical of that phase.
